2025 IEEE 31st International Conference on Embedded and Real-Time Computing Systems and Applications (RTCSA)

RTCSA 2025

Table of Contents

Message from General and Program Chairs ..... **x**
Organizing Committee ..... **xi**
Program Committee ..... **xii**
Sub-Reviewers ..... **xiv**
Steering Committee ..... **xv**
Advisory Board ..... **xvi**
Sponsors ..... **xvii**

Session 1

Autoware.Flex: Human-Instructed Dynamically Reconfigurable Autonomous Driving Systems 1
Ziwei Song (City University of Hong Kong, Hong Kong), Mingsong Lv (The Hong Kong Polytechnic University, Hong Kong), Tianchi Ren (City University of Hong Kong, Hong Kong), Chun Jason Xue (Mohamed bin Zayed University of Artificial Intelligence, UAE), Jen-Ming Wu (Hon Hai Research Institute, Taiwan), and Nan Guan (City University of Hong Kong, Hong Kong)

Passing-Order Decision for Three-to-Two Lane Merging of Connected and Autonomous Vehicles ... 12
Cheng-Pei Chien (National Taiwan University, Taiwan), Ben-Hau Chia (National Taiwan University, Taiwan), Ching-Yun Chang (National Taiwan University, Taiwan), Shang-Chien Lin (National Taiwan University, Taiwan), Iris Hui-Ru Jiang (National Taiwan University, Taiwan), Changliu Liu (Carnegie Mellon University, United States), and Chung-Wei Lin (National Taiwan University, Taiwan)

Approaches for Integrating Deep Learning Models for Inference using AUTOSAR in ECU 22
Rudraksha Kelkar (Mercedes Benz Research and Development India, India), Manishankar Rao (Mercedes Benz Research and Development India, India), Immanuel Utchula (Mercedes Benz Research and Development India, India), Akshata Kulkarni (Mercedes Benz Research and Development India, India), and Kaushik Raghunath (Mercedes Benz Research and Development India, India)

MURAL: A Multi-Resolution Anytime Framework for LiDAR Object Detection Deep Neural Networks 33
Ahmet Soyyigit (University of Kansas, KS), Shuochao Yao (George Mason University, VA), and Heechul Yun (University of Kansas, KS)

Cycle-Removal-Based Priority Policies Coordination for Distributed Intelligent Intersection Management 44
Kai-En Lin (National Taiwan University, Taiwan), Wan-Ling Weng (National Taiwan University, Taiwan), Eunsuk Kang (Carnegie Mellon University, United States), and Chung-Wei Lin (National Taiwan University, Taiwan)

Session 2

Energy-Efficient Joint Offloading and Resource Allocation for Deadline-Constrained Tasks in Multi-Access Edge Computing 55
Chuanchao Gao (Nanyang Technological University, Singapore) and Arvind Easwaran (Nanyang Technological University, Singapore)

Mobility-Aware Real-Time Task Allocation in the 5G-Enabled Embedded–Edge Compute Continuum. 68
Xiaopeng Teng (Linköping University, Sweden), Soheil Samii (Linköping University, Sweden), and Johan Wibeck (Ericsson AB, Sweden)

Towards Low-Latency GPU-Aware Pub/Sub Communication for Real-Time Edge Computing 79
Hao-En Kuan (National Taiwan University, Taiwan), Yung-Hsiang Yung (National Taiwan University, Taiwan), Zen-Mou Jiang (National Taiwan University, Taiwan), Chi-Sheng Shih (National Taiwan University, Taiwan), and Shih-Hao Hung (National Taiwan University, Taiwan)

ATER: Adaptive Task Execution Rate Regulation for Enhanced Real-Time Performance in ROS 2 90
Ruoxiang LI (City University of Hong Kong, Hong Kong), Ziwei Song (City University of Hong Kong, Hong Kong), Mingsong Lv (The Hong Kong Polytechnic University, Hong Kong), Jen-Ming Wu (Hon Hai Research Institute, Taiwan), Chun Jason Xue (United Arab Emirates, United Arab Emirates), Jianping Wang (City University of Hong Kong, Hong Kong), and Nan Guan (City University of Hong Kong, Hong Kong)

Feature-Aware Task-to-Core Allocation in Embedded Multi-Core Platforms via Statistical Learning 102
Mohammad Pivezhandi (Wayne State University, USA), Abusayeed Saifullah (Wayne State University, USA), and Prashant Modekurthy (University of Nevada, USA)

Session 3

From Tracepoints to Timeliness: A Semi-Markov Framework for Predictive Runtime Analysis 114
Benno Bielmeier (Technical University of Applied Sciences Regensburg, Germany), Ralf Ramsauer (Technical University of Applied Sciences Regensburg, Germany), Takahiro Yoshida (Tokyo University of Science, Japan), and Wolfgang Mauerer (Technical University of Applied Sciences Regensburg, Germany)

Predictable Memory Bandwidth Regulation for DynamIQ Arm Systems 126
Ashutosh Pradhan (Technical University of Munich), Daniele Ottaviano (Technical University of Munich), Yi Jiang (Technical University of Munich), Haozheng Huang (Technical University of Munich), Jiajia Zhang (Technical University of Munich), Alexander Zuepke (Technical University of Munich), Andrea Bastoni (Technical University of Munich), and Marco Caccamo (Technical University of Munich)

Resilient Scheduling of Real-Time Cyber-Physical Systems against Memory-Corruptions 138
Abdullah Al Arafat (North Carolina State University), Kurt Wilson (North Carolina State University), Sudharsan Vaidhun (University of Central Florida), Bryan C. Ward (Vanderbilt University), and Zhishan Guo (North Carolina State University)

REMUS: Efficient Multi-Request Scheduling in Computational Storage Devices 150
Yun Huang (City University of Hong Kong; Mohamed bin Zayed University of Artificial Intelligence), Shuhan Bai (Huazhong University of Science and Technology), Qiang Su (Xiamen University), Heng-Lin Yen (YEESTOR Microelectronics Co., Ltd.), Nan Guan (City University of Hong Kong), Tei-Wei Kuo (Academia Sinica & National Taiwan University), Xue Liu (Mohamed bin Zayed University of Artificial Intelligence), and Chun Jason Xue (Mohamed bin Zayed University of Artificial Intelligence)

Session 4

Integrated Cost Optimization and Preemptable Scheduling for Real-Time Ethernet Applications 158
Ayla Babazade (Linköping University, Sweden), Soheil Samii (Linköping University, Sweden), and Ahmed Rezine (Linköping University, Sweden)

EtherTime: Cross-Vendor Evaluation of PTP/NTP on Ethernet-Based COTS Embedded Platforms . 169
Vincent Bode (Technical University of Munich, Germany), William Shen (University of British Columbia, Canada), and Arpan Gujarati (University of British Columbia, Canada)

Beyond the Bermuda Triangle of Contention: IOMMU Interference in Mixed Criticality Systems.... 183
Diogo Costa (Universidade do Minho, Portugal), José Martins (Universidade do Minho, Portugal), and Sandro Pinto (Universidade do Minho, Portugal)

Session 5

Adaptive Model Selection for Real-Time Heart Disease Detection on Embedded Systems 195
Yixin Li (North Carolina State University), Zhiling Li (Southern University of Science and Technology), Abdullah Al Arafat (North Carolina State University), Donald Johnson (Evergreen Healthcare), Ning Sui (North Carolina State University), Anil Gehi (UNC School of Medicine), and Zhishan Guo (North Carolina State University)

Efficient Gradient-Based Network Calculus for Scalable Synthesis of Network Configurations..... 206
Fabien Geyer (Airbus Central Research & Technology, Germany) and Steffen Bondorf (Ruhr University Bochum, Germany)

Low-Carbon Autonomous Driving Computing via Adaptive Solar Batteries 214
Siyuan Zhou (Nanyang Technological University, Singapore), Zimo Ma (Nanyang Technological University, Singapore), and Rui Tan (Nanyang Technological University, Singapore)

The Cost of Accurate Predictions in Learning-Augmented Scheduling 221
Zhiyun Jiang (The University of Sydney, Australia), Tianming Zhao (The University of Sydney, Australia), Chunqiu Xia (The University of Sydney, Australia), Wei Li (The University of Sydney, Australia), and Albert Zomaya (The University of Sydney, Australia)

Poster/Demo Presentations

Surefire UAV: A CPS Testbed 233
Shiyu Zhang (The Hong Kong Polytechnic University, China), Qixin Wang (The Hong Kong Polytechnic University, China), and Qipeng Qin (The Hong Kong Polytechnic University, China)

Demo: VecSim, a Vehicular Edge Computing Simulator for Real-Time Applications 235
Chuanchao Gao (Nanyang Technological University, Singapore) and Arvind Easwaran (Nanyang Technological University, Singapore)

Poster: Emergency-Aware TSCH Scheduling for High-Density Low-Power and Lossy Networks ... 237
Jiamei Lv (Zhejiang University), Hailang Zhang (Zhejiang University), Yeming Li (Zhejiang University), Wei Dong (Zhejiang University), and Yi Gao (Zhejiang University)

Poster: A Comparative Analysis of Machine Learning Models for SAT Runtime Prediction 239
Tomohisa Kawakami (Duke University, USA), Tomoyasu Shimada (Ritsumeikan University, Japan), Xiangbo Kong (Toyama Prefectural University, Japan), Hiroyuki Tomiyama (Ritsumeikan University, Japan), and Shigeru Yamashita (Ritsumeikan University, Japan)

Poster: Unsupervised Attack Classification in Smart Grid AGC using Variational Autoencoder Gradient Profiles 241
Tran L. T. Le (Singapore University of Technology and Design), David K.Y Yau (Singapore University of Technology and Design), and Song Qun (Singapore University of Technology and Design)

Poster: Criticality-Aware Drone Routing for Post-Disaster Delivery under Deadline and Energy Constraints 243
Daichi Iwasa (Suito International Senior High School, Japan; The University of Osaka, Japan) and Hiroki Nishikawa (The University of Osaka, Japan)

Poster: Reusable Software Components to Prototype and Evaluate Mixed-Criticality Scheduling Policies 245
Alan Le Boudec (University of Brest, France; Thales DMS, France), Hai Nam Tran (University of Brest, France), Stéphane Rubini (University of Brest, France), Alexandre Skrzyniarz (Thales DMS, France), and Frank Singhoff (University of Brest, France)

Demo: Real-Time Inference on GPU-Based Heterogeneous SoCs with GPU Cache Locking 247
Kehao Ma (Shandong University, China), Wei Zhang (Shandong University, China), Mengying Zhao (Shandong University, China), and Lei Ju (Shandong University, China)
